DermPath Diagnostics Arizona

7485 E. Tanque Verde Road, Tucson, AZ 85715

My goal as a dermatopathologist at DermPath Diagnostics is not only to make the correct diagnosis, but to determine the most precise diagnosis possible for your patient. This is especially true for diagnosing inflammatory disease and alopecia. Because clinicopathologic correlation is critical, I use clinical photos, clinical history and laboratory results to help arrive at the best diagnosis. I love searching the literature for supporting data and I enjoy actively working with clients to help care for their patients. Although I am a full-time dermatopathologist, I work to maintain my dermatology clinical skills by regularly attending grand rounds and educational meetings and volunteering in area skin cancer screenings.

Our group is involved with teaching residents from several dermatology residency programs throughout Arizona, and we frequently have dermatology residents, medical students, physician assistants, and others rotating through our laboratory.
