PATIENT INFORMATION

Valued Patient

Sex: Female
Age: December 14, 1926 (Age: 88)
MRN #:
Phone:
Ref Physician: Dr. Awesome

PHYSICIAN INFORMATION

Dr. Awesome

SPECIMEN INFORMATION

Collected: 08/03/15
Received: 08/03/15
Reported: 08/04/15
Accession #: KA15-15869
Acct / Reg #: 28679

DERMATOPATHOLOGY REPORT

DIAGNOSIS

DIAGNOSIS:

SKIN, LEFT UPPER LIP, CURETTAGE:
Basal cell carcinoma, nodular, fragmented.

Sheila O. Roumpf, M.D.
Electronic Signature: 04 AUG 2015, 11:26AM

CLINICAL INFORMATION

CLINICAL HISTORY:

Preoperative Diagnosis: BCC
Postoperative Diagnosis:
Symptoms/Radiologic Findings:

SPECIMENS:

15-2756-A: Left upper lip curettage

SPECIMEN DATA

GROSS DESCRIPTION:

Container A Valued Patient left upper lip, received in formalin is a 0.3 x 0.2 x 0.1 cm aggregate of tan friable skin fragments. The specimen is entirely submitted in tissue paper in cassette labeled A1.
JF/skp

MICROSCOPIC EXAMINATION:

The specimen consists of skin with nodular masses of basal neoplastic cells with small hyperchromatic nuclei, nuclear pleomorphism, scanty cytoplasm and peripheral palisading of nuclei typical of basal cell carcinoma. The specimen is fragmented.

Place of Service: AmeriPath 2560 N. Shadeland Ave., Ste A Indianapolis, IN 46219

CC:; Herman,Kathy

DERMATOPATHOLOGY REPORT

DIAGNOSIS

DIAGNOSIS:

SKIN, LEFT MEDIAL KNEE, SHAVE BIOPSY:
Dermatofibroma.

Sheila O. Roumpf, M.D.
Electronic Signature: 04 AUG 2015, 11:26AM

CLINICAL INFORMATION

CLINICAL HISTORY:

Preoperative Diagnosis: Dermatofibroma
Postoperative Diagnosis:
Symptoms/Radiologic Findings:

SPECIMENS:

15-2754-A: Left medial knee shave

SPECIMEN DATA

GROSS DESCRIPTION:

Container A Special Patient left medial knee, received in formalin is a 0.5 x 0.5 x 0.2 cm fragment of tan slightly nodular, firm skin; the margin is inked in blue. The specimen is bisected and entirely submitted in cassette labeled A1.
JF/skp

MICROSCOPIC EXAMINATION:

Beneath an acanthotic epidermis, there is a circumscribed unencapsulated area of collagen with an increase in fibroblasts with some histiocytes and trapped collagen bundles.
